MADERA

Fühbar glatt und dennoch sehr reißfest - diese hervorragenden Merkmale werden durch die neue Zwirnkonstruktion erzielt, die den metallisierten Anteil im Garn um außergewöhnliche Eigenschaften reduziert. Das Smooth Metallic besonders biegsam beim Verstricken und verleiht dem Garn seine Geschmeidigkeit.

Smooth touch and strong performance thanks to a new and elaborated twist construction. The strong Triobal PES core is wrapped by a narrow metallic PES-fil and reduces the metalized proportion in the thread to only 25%. This makes the twist extremely flexible and gives the thread this unique smoothness.

Tacto suave y alta resistencia: gracias a un nuevo y elaborado sistema de torcedo. El fuerte núcleo de PES triobal se envuelve de una estrecha lámina PES metalizada y reduce la proporción metalizada del hilo a solo un 25%. Esto hace que el entrelazado sea extremadamente flexible y que el hilo tenga una sedosidad única.

Un toucher agréable et une performance supérieure grâce à une nouvelle fabrication torsadée élaborée. Le solide noyau PES triobal est enveloppé dans une fine feuille métallisée de PES et réduit seulement 25% la proportion de métal dans le fil. La torsade en devient extrêmement flexible et confère au fil cette douceur unique.

Liscio al tatto, ottime prestazioni grazie ad una nuova e sofisticata struttura. L'anima robusta in poliestere triobal è rivestita da una sottile pellicola di poliestere metalizzato. Ciò riduce al 25% la parte metalizzata del filato, contribuendo a renderlo particolarmente flessibile e liscio al tatto.

Pürüzüş temas ve güçlü performans: Bu göz alıcı kombinasyon, yeni ve işlevim yüksekliği yarım sonucudur. Güçlü Triobal Polyester iplik, ince ve zar metalize PES-folyosu ile sarımsız ve iplik-metal oranı yalnızca %25 azaltmıştır. Bu büküm çok büyük oranda esnek yapmaktaki ve ipliğe bu esnek düzgünlüğü vermektedir.

Результат новых разработок - потрясающе гладкая и высококачественная нить. Именно благодаря ей даже большие поверхности вышивки остаются ровными и приятными на ощупь. Металлизированная часть нити содержит меньше серебра, и это придает нити благородный вид. Особый состав нити гарантирует ей новые свойства.

نتيجة من الفسوف في الألياف - النخيل المتطور والخيوط رقيقة جداً التي تتميز بلمعة رائعة. هذا يجعلها مناسبة جداً للخيوط المعدنية. هذا هو ما يجعلها تتميز بلمعة رائعة. هذا هو ما يجعلها تتميز بلمعة رائعة. هذا هو ما يجعلها تتميز بلمعة رائعة.
